**Zips**
Single Port Alarm Unit
Merchandising Guide
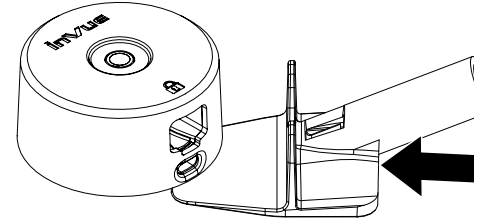

1. Use a charged and coded OneKEY to deactivate the Alarm Unit.

2. If the Alarm Unit was powered, unplug the power supply from the outlet and unplug the cable from the Alarm Unit.

3. If removing the Alarm Unit from the position, use the scraper removal tool (DNTX93) to break the adhesive bond between the Alarm Unit and the fixture surface.
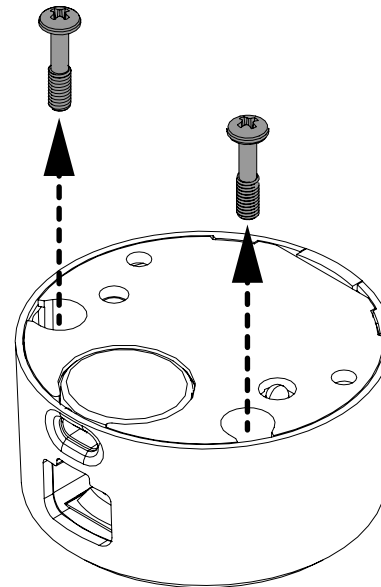

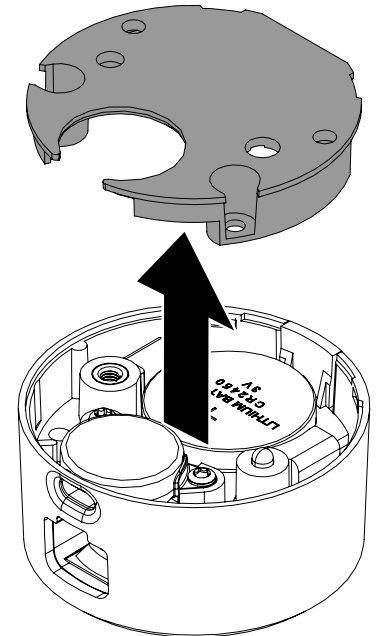

4. Peel the old adhesive from the Alarm Unit.

5. Use an alcohol wipe to clean any adhesive residue from the bottom of the Alarm unit. Allow it to dry completely.

6a. If the battery needs to be changed out, use a Philips head screwdriver to remove the 2 screws in the bottom of the Alarm Unit.
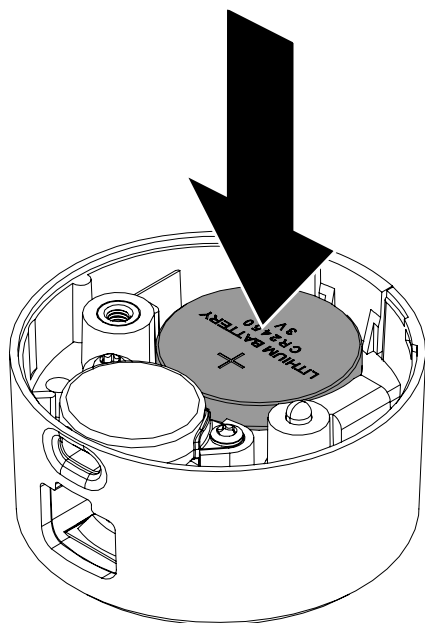

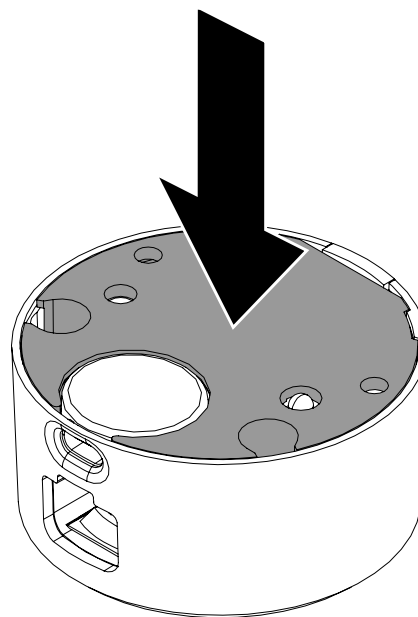

6b. Remove the base plate.
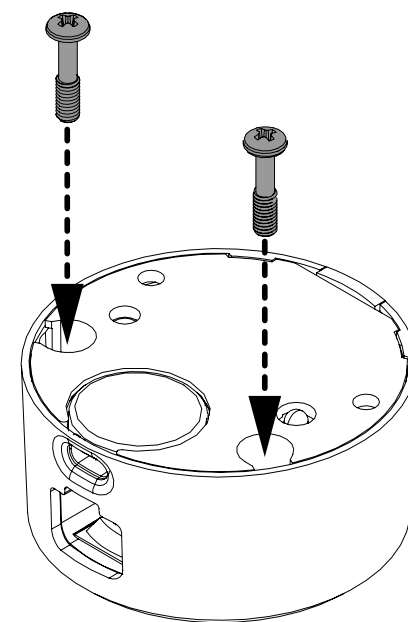

6c Remove the old battery.

6d Insert the new CR2450, with the Positive Side (+) facing up, into the battery holder.

**6e** Replace the base plate.

6f Insert and tighten the screws to secure the base plate to the Alarm Unit.

7 Remove one of the replacement adhesives (ADH2308) from it's backing and align it with the bottom of the Alarm Unit. Smooth it into place for at least 10 seconds.
Note: The Alarm Unit is now ready to be reinstalled. Consult the installation guide for more information.
