**Custom Alarming Stylus
Tether & Tray**
ZA2720-G/W, ZA2503-G

**1** Clean the stylus with the provided alcohol wipe. Let it dry completely.

2 Insert the stylus into the sensor. Align the sensor with the end of the stylus as shown below.
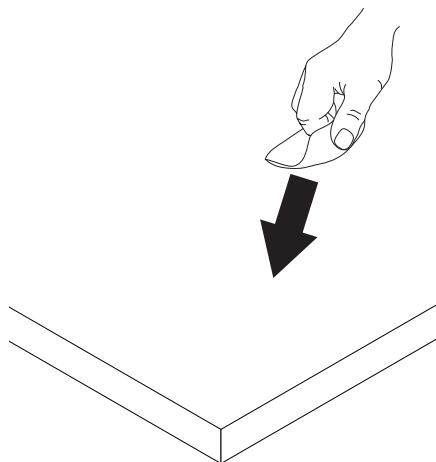

**3** Pull the tabs on the adhesives and pinch the sensor against the stylus for at least 10 seconds.

**4** Plug the micro USB connector into a Zips! 2.0 alarm unit. The alarm unit will chirp.

5 Clean the surface where the tray will be mounted with the provided alcohol wipe. Let it dry completely.
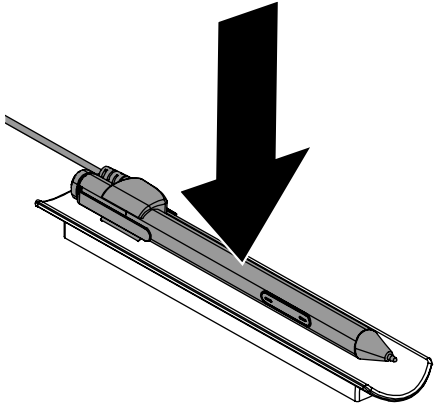

6 Remove the clear film from the adhesives.

7 Firmly press the tray against the surface for at least 10 seconds.

* This sensor can also be used with the S2800, S1060 and Zips! Power systems.

8 Place the stylus and sensor onto the tray.
