Rev2 9.12.2018

### InVue Parts

---

#### DESCRIPTION

Polish Packet

#### DESCRIPTION

Microfiber Cloth

InVue Customer Service **888.554.6883** (option 2)  
Hours: 8 AM - 5 PM EST

## Application

1 Open the polish packet.

2 Squeeze a small amount of polishing compound onto the back of the device where the sensor will be placed.

3 Use the microfiber cloth to firmly rub the polishing compound onto the device for 15-20 seconds.

4 Use the microfiber cloth to firmly buff the back of the device.

**Note:** A visual difference may not be apparent.

5 The device is now ready to have an LSE plate or other adhesive applied to the surface.

**Note:** Repeat the process for any additional devices.

## Adhesive Polish Kit (ADH2300)

---

- The polish kit includes a polishing compound and microfiber cloth to remove a microscopic layer that is not visible to the naked eye. The polish prepares the surface to accept the adhesive without changing the appearance.
- There is enough compound in one packet to be used on at least 5 phones at a time. One packet included per unit.
- ADH2300 is the only solution that will work for all devices, and it must always be used for the following phone types:
  - iPhone
  - Samsung Galaxy
  - Google Pixel
  - Moto One
  - Huawei Mate
